*"Any new beginning is forged from the shards of the past,
not from the abandonment of the past." - Craig D. Lounsbrough*

Looking Forward To The Future

Hello {FIRST_NAME|Friend},

As we are beginning a new year and have closed out the previous year, we can't help but express our gratitude for past and current clients, as well as our eagerness to serve the modular and mobile laboratory needs of former, current, and new clients in the year to come. It is a privilege to work with companies and organizations from various backgrounds nationally and internationally (including construction, engineering, education, medical, military, and more), and it is our sincere hope that the depth of our reach will only continue to grow in this new year and years to come.

**Thank you for helping us make 2018 a success, and from all of us at CERTEK,
best wishes for a very Happy, Peaceful, and Prosperous New Year!**

Keep biosafety in mind when designing your laboratory.

The subject of biosafety is important to take into consideration when deciding on what type of laboratory you need and specifications necessary to meeting the biosafety level requirement. Each biosafety level requires a set of guidelines and standards that must be followed in a design and the construction processes that will ensure containment, or isolation of dangerous biological materials, for a given laboratory. Different biosafety level laboratories require different guidelines and standards, ranging from the lowest, biosafety level 1 (BSL-1), to the highest, biosafety level 4 (BSL-4). At CERTEK we know that safety is paramount, and we have worked diligently to make sure we can provide laboratory designs and laboratory set ups that comply with biosafety level requirements. To find out more, visit our [ReadyPOD Mobile Laboratory](#) and [Modular Laboratory](#) pages or talk with a CERTEK representative by calling +1-919-787-3989.

Learn more about CERTEK's line of small products, accessories, and kits.

While we specialize in mobile and modular laboratories, many of our clients are looking for components for existing laboratories; that is why we also offer a small product line of kits and accessories to contribute to the safety and value of any laboratory. From Pressure Monitors and Door Interlock Systems to Damper Controls and various HEPA Filters, we have solutions for many laboratory needs. And our product line is always growing! Most recently we have added the HAZguard Compact Glovebox to our line of safety products. This product as your primary containment is vital to keeping users safe by maintaining proper pressure levels and keeping biohazards isolated. For more information about our other product lines, visit our [Accessories and Kits](#) page. Make sure to sign up for our newsletter by clicking the link below to stay updated on new products.
