

Helping Communities Reopen During the Pandemic

Although the COVID-19 pandemic is still a serious global issue, it is encouraging to see businesses and other public places beginning to reopen and receive traffic once again. During this time, it is important for all of us to continue to make our best efforts to make spaces safe for owners and patrons alike. CERTEK is helping communities reopen by offering decontamination services to businesses and continuing our efforts to provide medical researchers and providers, with innovative lab solutions and products. Together we will continue to persevere.

Continuing the Fight Against COVID-19

CERTEK has been working tirelessly to help combat COVID-19. We recently collaborated with Duke Health and Novant Health to develop a decontamination chamber to decontaminate small and large equipment, including N95 masks on a large scale. (Keep reading to find out more about the CERTEK Mobile Decontamination Chamber below). We have also received calls from pharmaceutical and research companies for modular and mobile laboratories to continue research for COVID-19 vaccines, testing, and more. We have also been contacted by other countries concerning ways that we can help them in COVID-19 research and for future preparedness. CERTEK is proud to help both our nation and other countries continue the fight against COVID-19.

Have You Seen Our Mobile Decontamination Chamber?

The CERTEK Mobile Decontamination Chamber (CMDC) is manufactured in one-trip shipping containers and was designed for decontaminating small and large equipment, including N95 masks on a large scale (up to thousands of N95 masks per cycle). CERTEK can complete these chambers in a matter of days depending upon the selected options, and USA orders with specific options can be manufactured and ready for shipping in two weeks, while international orders will take approximately three week for the same selected options.

ISOLATION SOLUTIONS

Container Rooms
and Pure-Air Systems

Isolation Solutions for Safe Keeping

CERTEK is proud to provide isolation solutions in the form of Container Rooms and Pure-Air Systems. CERTEK's Isolation Rooms offer screening and holding solutions in the form of 20' to 40' containers that maintain a negative pressure when used in conjunction with CERTEK's Pure-Air HC System. If you already have a space that you would like to use as an isolation area CERTEK's Pure-Air ES System is an excellent solution for transforming existing conditioned space into an isolation area. The easy installation of this system offers a quick and cost effective solution for emergency situations.
